

Get the care you need when you need it.

Kelsey-Seybold is available 24/7 if you have questions about urgent care matters, need to speak with an after-hours nurse, or have your doctor or your child's pediatrician paged. Call 713-442-0000. Four Kelsey-Seybold locations are also open on Saturdays to accommodate ill care for children and adults.

When to Visit Your Primary Care Doctor

When your care calls for it, it's usually best to go to your Kelsey-Seybold primary care doctor. They know you and your health history best and have access to your Electronic Medical Record. A visit with your Kelsey-Seybold primary care doctor instead of going to the Emergency Room (ER) can also save you money! And remember, Kelsey-Seybold offers primary and specialty care at 19 locations throughout the Greater Houston area.

Urgent Care Centers

VS.

Emergency Room (ER)

When to go to an Urgent Care Center:

Urgent care centers can handle many **non-life-threatening** conditions such as a high fever, abdominal pains, earache, insect bites, minor cuts requiring stitches, minor burns, muscle spasms, asthma attacks, rashes, and urinary tract and pelvic infections. And because urgent care centers have X-ray capability, they can treat simple fractures and sprains.

(See reverse for a list of participating Urgent Care Centers)

If a situation seems life-threatening, take immediate action and call 911.

When to go to the Emergency Room:

If you have a serious condition – stroke, heart attack, severe bleeding, head injury or other major trauma – you should be seen in an emergency room. The ER is the best place for these and other critical conditions, including:

- Chest pain.
- Difficulty breathing.
- Severe bleeding or head trauma.
- Loss of consciousness.
- Sudden loss of vision or blurred vision.
